

FRONTEND CHALLENGE

1st Part: Replicate the following landing page. You *can use any JavaScript framework* (Angular, React, Svelte, Vue, etc) if you want. Keep in mind:

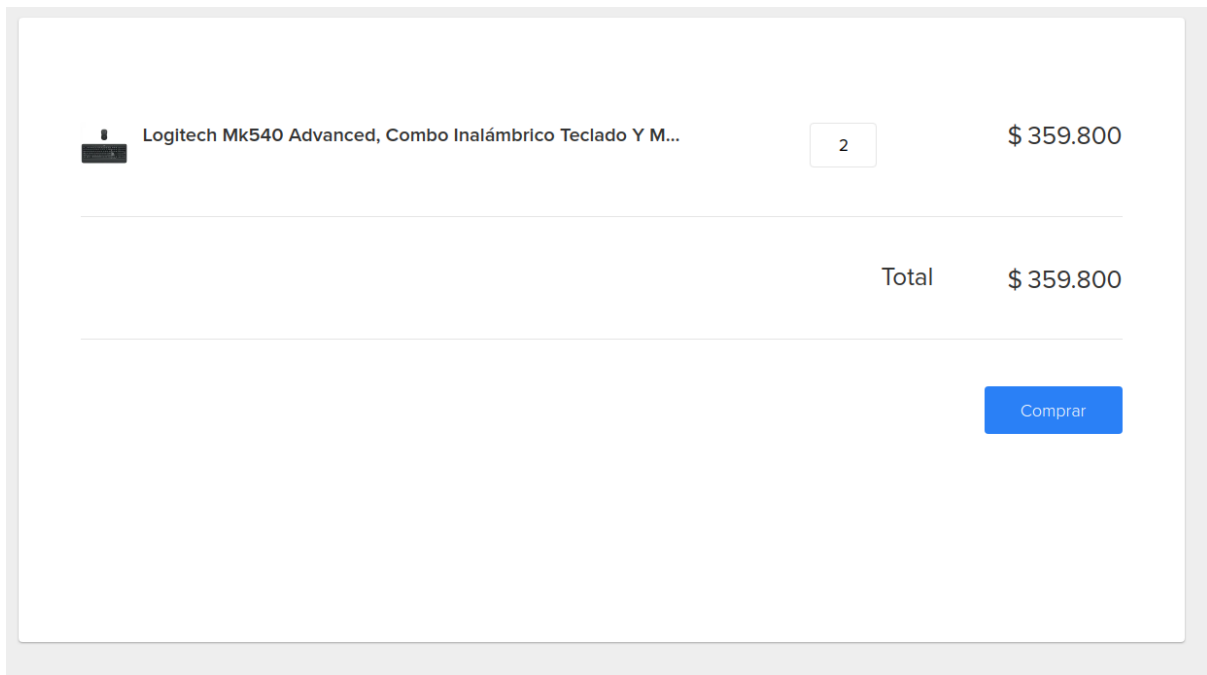

- Fonts used are available in [Google Fonts](#) (Montserrat, Roboto Thin)
- A sketch file is attached. You could use [Figma](#) (free) to upload it and open it.
- We're not expecting a responsive solution, but any consideration on your part to make it more suitable for mobiles will be a **plus**.

IMPORTANT: You must write all the CSS and HTML from scratch. Using any CSS Framework is strictly forbidden.

2nd Part: Load products from a JSON file, add products to a Shopping Cart and Create a new view for checkout (ecommerce shopping cart), where you can see products added from the previous view:

- Product need be loaded from `products.json` file (images could be the same for all products)
- Products added must remain in the cart if users close the page or the browser, only should be deleted if the user makes the purchase.

The screenshot displays a shopping cart interface within a light gray border. At the top, there is a header bar with a small black icon on the left and the text "Logitech Mk540 Advanced, Combo Inalámbrico Teclado Y M..." in the center. Below this, the cart items are listed. The first item is represented by a small black square icon, followed by the text "Logitech Mk540 Advanced, Combo Inalámbrico Teclado Y M...". To the right of the item name is a quantity input field containing the number "2". Further right is the price "\$ 359.800". A horizontal line separates this item from the total section. Below the line, the word "Total" is aligned to the right, followed by the price "\$ 359.800". Another horizontal line is below the total. At the bottom right of the cart area, there is a blue button with the text "Comprar" in white.

Item	Quantity	Price
Logitech Mk540 Advanced, Combo Inalámbrico Teclado Y M...	2	\$ 359.800
Total		\$ 359.800
